we laughs at them yesterday,
we rob them tomorrow**

About Us

INFINITY CONNECTS LEARNING is working to bring about a systemic change to Indian education by marrying education with technology. We proudly say that our technology based products and solutions have been adding value to education to the benefit of all our stakeholders.

Technology improves content as well as content delivery

Gone are the days when learning meant a teacher standing in front of the class with textbooks and chalk drawings on the board which would appeal to and is effective for only a handful of analytical students. With the advent of technology, we can now create top-of-the-line interactive audiovisuals, hands-on activities, and simulations to appeal to auditory, visual as well as aesthetic learners. Products and solutions by **INFINITY CONNECTS LEARNING** ensure that the diverse needs, abilities, and learning styles of all learners are catered to.

We are INFINITY CONNECTS LEARNING.
Education for us is
NOT JUST BUSINESS, BUT A CAUSE.

Vision

Assist understudies with recognizing their inclinations
and explore them towards the correct course

Values

- We build optimal solutions. The money customers save gets reinvested in the parts of a student's development.
- We focus on improving learning outcomes. Solutions must be designed to work in local communities with this objective in mind.
- We are austere. We guard and conserve the company's resources with the same vigilance as we would guard and conserve our own.
- We are here for the long run. We believe in partnership with our employees, customers, vendors, governing bodies, and other stakeholders to strengthen the ecosystem over a long time horizon.

INDIA — The Right Place

India is poised to embrace improvements in the education system

**Youth Capital of the world
29.5% ' of! India's population is
below the age of 14**

"According to 2011 Census of India

Education & Career Foremost

**51%" of parents in India want their children to have access
to a great education and subsequent success! career.**

"According to a 2015 HSBC Study

Driving force behind our products

Technology

Technology today is interwoven with every aspect of our lives and at
[INFINITY CONNECTS LEARNING](#)

we believe that scalable, sustainable, personalized quality education for a student is possible only by leveraging technology.

We are dedicated to making our systems more intuitive and interactive

Service & Support

- We believe that our products and solutions aren't complete without the ceaseless efforts of our in-house service and support team both online and on-field.⁷
- Our team is highly trained and efficient and all tech-related issues are solved within a turn around time of 5-7 days
